

# MOHAMED IBRAHIM H

ENTREPRENEUR | STRATEGIST | DESIGNER | DEVELOPER | TECHNICIAN | ENTHUSIAST

I'm a self-taught tech enthusiast with over 5 years of hands-on experience across diverse systems, business technology domains, automation tools, and digital infrastructure. My core strength lies in identifying technical issues, troubleshooting with precision, and building dependable systems that simply work.

Whether it's managing complex hardware setups, configuring software and networks, leading teams, handling customer operations, or designing end-to-end automation workflows – I take care of it all. I'm a fast learner who thrives on solving problems. If a tool or technology is unfamiliar, I don't hesitate – I dive in, figure it out, apply it, and improve it.

## JOB EXPERIENCE

### Founder & CEO

Jan 2024 – Present

Gen2k Conglomerate, Kilakarai.

I started Gen2K Conglomerate to help youngsters in Kilakarai become entrepreneurs by giving them exposure to technology, business, and operations. I have conducted workshops, offered free coaching at a minimal setup, and built a team in different fields. I have also launched multiple business initiatives to create a people-powered system that encourages new businesses, self-employment, and startup growth.

By supporting small businesses and helping students and freshers start from scratch, I aim to make business easier. My goal is to simplify operations, provide tech-driven solutions, and help startups and small businesses work more efficiently.

### Senior Graphic Designer

Jan 2023 – Jan 2025 (2 years 1 month)

MI DD WORKSHOP, Kilakarai.

I started this initiative as a freelance design agency, handling branding, social media design, and marketing materials for various companies. I have created designs for different business needs and became highly skilled in this field over time. Along the way, I learned a lot about design and front-end development, and I began building my own team of freshers, freelancers, and business professionals.

My expertise in Adobe Photoshop and marketing strategies helps me create creative and effective solutions that support business growth.

### Freelance Graphic Designer

Jan 2023 – Jul 2023 (7 months)

Multiple Companies, Global Scale

I started out as a freelance graphic designer, working with clients from different parts of the world. Most of my projects involved designing logos, posters, social media posts, and all kinds of promotional content. Over time, I had the chance to collaborate with several marketing firms, design agencies, and business professionals across various industries.

I worked in all kinds of setups—remote, hybrid, and on a contract basis—depending on the project. It also taught me how to manage time, communicate clearly, and adapt quickly to different styles and tools.

### Fiber Network Technician

Aug 2022 – Jul 2023 (1 year)

Elegant Network Solutions (BSNL Dealer), Kilakarai.

I worked as a fiber network technician, where I handled everything from setting up fiber optic connections to fixing internet issues for homes and businesses. My main focus was to make sure people had a fast, stable, and reliable network experience. Whether it was installing new lines, troubleshooting technical problems, or helping customers understand their setup, I was the go-to person.

I also provided 24/7 customer support in my area, making sure anyone facing network troubles got quick and practical help—day or night. It taught me how to stay calm under pressure, solve problems efficiently, and always put the user experience first.

### Junior Graphic Designer

Jul 2020 – Aug 2022 (2 years 2 months)

Sharmila Digital 4K Media, Kilakarai

I worked as a Junior Graphic Designer and Office Assistant, where I handled day-to-day office tasks, worked with photography gear, and supported event setups. I created simple design materials, edited basic wedding videos, designed albums, and did photo retouching. I also helped with Windows troubleshooting and set up basic automation to save time on repetitive tasks. This role gave me hands-on experience in both creative and technical areas, helping me build a well-rounded skill set.

### Computer Technician

Oct 2019 – May 2020 (8 months)

Fix it Laptop & Mobile Services, Kilakarai

At Fix It, I gained hands-on experience repairing and troubleshooting mobile phones, laptops, and desktops. I also learned about software installation, networking, basic automation, print setup, and device configuration. Alongside the tech work, I started doing graphic design – creating flyers, banners, and signboards for local businesses. This role helped me build both my technical and creative skills through real, everyday work.

### Computer Technician (trainee)

Apr 2018 – Aug 2019 (1 year 5 months)

Shaj Xerox, Kilakarai

This was my first real exposure to computers, printers, and software. I joined as a trainee and worked part-time as a computer hardware technician, where I handled printer maintenance, fixed basic computer issues, and supported local customers with technical help. In my free time, I started learning MS Office and Photoshop, which helped me build strong skills in writing, documentation, and creating simple presentations.

It was a great starting point that sparked my interest in tech and design.

### Sales Employee

Nov 2017 – Feb 2018 (4 months)

Indian Super Market, Kilakarai

I worked as a sales employee, where I helped customers, managed basic stock tasks, and handled small transactions. This role taught me how to communicate clearly, understand customer needs, and build basic sales skills. It gave me a solid foundation in dealing with people and handling day-to-day shop operations.

Over the years, I've built up more than 30,000 hours of hands-on experience by working across different roles and responsibilities. I started at the ground level, doing junior tasks, but I never stayed in one place for long – I kept learning, adapting, and taking on more. Eventually, I found myself managing entire systems and operations on my own.

Here's a quick look at my journey - my skills, work ethic, collaborations, and industry experience.  
I've kept it short for your time, but I'm happy to share more if needed.  
You'll also find my contact details, so feel free to reach out anytime. Looking forward to connecting!

### WORK ETHIC & PROMISE

Based on my experience and competencies, I can handle whatever comes my way. Whether I'm working for myself or for you, I give nothing less than 100% of my effort.

I believe great things don't come from lazy work, and you can trust me to **always strive for excellence.**

If this is a job proposal, I can do exactly what's outlined in my offer letter fully committed, with my heart and soul. If you hire me, I'll dedicate myself to the very reason I was brought on board.

If this is about collaboration, I understand what your business needs. With my level of experience, I can quickly grasp your vision and refine it through your input. **Our shared goal is success**, and my role is to bring it closer with every effort I make.

If this is a proposal, everything stated in my profile is 100% true... but, it's only half the story. I've kept it professional here, I just didn't want my profile to turn into a life novel!

My journey, achievements, and experiments have already shaped a solid foundation before I even hit my 20s (I am 20 now). And I know there's so much more ahead. The future will define where and how I can contribute.

Let's connect and take this conversation forward.
